YACHTING

The experts in
air conditioning,
hydraulics and
refrigeration systems

ONBOARD ADVANCED BIO-SYSTEMS

Biotech Riviera was established in Sanremo in 2018, specializing in biosafety and onboard sanitization. We're certified experts in marine air conditioning and plumbing, equipped with the most advanced technologies on the market.

We work on both water and air systems aboard, preventing and eliminating potential issues. Our team carries out targeted onboard inspections and supports the preparation of all certifications required for both charter and private vessels. We operate from Saint-Tropez to Viareggio, with special focus and full service availability during the peak month of August, ensuring fast and efficient support when it's needed most.

CERTIFICATIONS AND SPECIALIZATIONS

- Environmental technicians specialized in biosafety (Sapienza Unitelma - Rome)
- Official F-Gas certification - Italy
- Marine Air Conditioning - Marine Hydraulics - Refrigeration Technicians - Sanitation Technicians

OUR SERVICES

ONBOARD AIR CONDITIONING

We ensure comfort and air quality on yachts through specialized interventions on fan coils, chillers, and air handling units (AHUs). From scheduled maintenance to component replacement, we provide solutions compliant with F-Gas regulations and international standards, reducing consumption and optimizing system performance.

REFRIGERATION AND COLD ROOMS

Our specialized refrigeration technicians work on refrigerators, freezers, and temperature-controlled cold rooms dedicated to the galley and crew. We carry out repairs, replacement of discontinued compressors, gas recharges, and energy optimization, ensuring service continuity and maximum efficiency even during long voyages.

ONBOARD HYDRAULICS

We manage complex water systems, from fresh water and domestic hot water distribution networks to desalination units and pumping systems. We perform repairs, installations, and emergency interventions in compliance with safety regulations (Legislative Decree 81/2008 and national/international guidelines), ensuring reliability and operational continuity.
